

COMMUNITY TRANS NURSERY AND PRIMARY SCHOOL PROFILE

School Background

Community Trans Nursery and Primary School was started by Mission Harvest Ministries in 2013 with a goal of reaching out to the humble and marginalized children of ages 3 and above, to enable them access a safe, nurturing, learning environment filled with appropriate learning activities. It started with a total number of 54 children and the number has kept on growing and now it has a total number of 436 learners out of whom 226 girls , 210 boys and 13 teachers ; female 9 – Male 4.

How it came into existence.

After conducting a situational analysis study of the levels of education, the findings revealed a low level of education and the community is illiterate, and surrounded by slums, it was observed that there was a big gap in regard to access of quality and affordable education especially for the children from marginalized and poverty stricken families. As a result, Mission Harvest ministries Uganda began the above school to help address the plight of the ever growing educational demands of children from such families in order to create hope for such families.

Mission

To produce upright, competent and God fearing Citizens.

Vision

To be as leading school in the transformation of the community.

OBJECTIVES/GOALS OF THE SCHOOL

To enable the learner's access quality and affordable education especially the humble and marginalized children.

To produce well nurtured and disciplined children for a better generation.

To combat the ever increasing levels of school dropout in our area.

To educate and produce God fearing Children to the enhancement and propagation of God's word.

LOCATION OF THE SCHOOL.

The school is located in Uganda East Africa , Iganga District, in the Northern Division, Igamba Village, Bikado zone, on Mulondo Road.

PRESENT ENROLLMENT

Currently, the school has a total enrollment of 436 pupils.(put girls and boys)

TEACHING STAFF

The school has a total of 13 qualified and experienced teaching staff and 4 members of the non teaching staff.

ACHIEVEMENT SO FAR

We are registered with the Iganga District Community Development Office.

We are in the final stages of licensing the school with the Ministry of Education sports and Technology.

The school has attracted more learners hence increasing the number of pupils to 436.

The school has gained recognition and good reputation in the community.

The academic performance of the learners has tremendously improved.

The school has acquired land for expansion.

The school has been able to put up some temporary structures to accommodate the ever rising numbers of children.

The school has installed a reliable safe source of drinking water for the children.

The school has actively participated in co-curricular activities like sports, music and drama

CHALLENGES

1. Due to the poverty levels of the parents, some children cannot afford to pay for their feeding at school Nb for each child to have a nutritious meal UGX 70,000 per child per term(three months) A study year has three terms.
2. Some children cannot afford to pay school fees and to acquire the necessary school requirements such as books pens , learner's instructional materials , realms of paper . The school has a Pre-school section, Lower Primary and Upper Primary Section.
3. Since the school is not fenced, children easily escape from school. The school stands on one Acre of land.
4. The school facilities like furniture, class rooms and other learning aids are inadequate.
5. Absenteeism and dropping out of school due failure to meet school requirements

WAY FORWARD

1. Since the school enrollment is ever increasing, there is need to construct permanent structures.
2. There is need to fence off the school to stop children from escaping from school.
3. There is need for helping some children especially those who cannot afford to pay for their school fees, feeding at school , and other personal and scholastic materials.
4. There is need to construct more sanitary facilities like Toilets to ensure a health and clean environment for the learners.
5. There is need to put up safety gadgets such as lightening arresters and fire extinguishers etc.
6. There is need to build the capacity of the teaching staff by enabling them to go for further studies and refresher trainings.

Conclusion

We are blessed to have linked up with you doctor Christine through Mr Owor Peter , we hope and we pray that let everything we are trying to plan be a success to help our young generation and the communities they reside from. In God we know that all shall be possible. And Dr Christine together with your friends and well wishers we put this school before you for now and for the future.

We are also very delighted as the directors of the above school to have got in touch with you, and we are sure the sky is the limit. We hope to continue communicating and one day one time we invite you to come and visit us and the school.

Yours in Service,

Florence Were

Director
